Emile BELIN-BOURGOGNE

122 Avenue Daumesnil, Paris / (+33) 06 22 67 25 87
emile.belinbourgogne@sciencespo.fr

Graduate of École des Ponts and the Paris School of Economics, I am a PhD student in Economics at Sciences Po. My research examines the microeconomic effects of carbon pricing, focusing on firm behavior and policy evaluation.

Education

Sciences Po, Department of Economics September 2026 – Present
PhD in Economics Paris
PhD research: *Microeconomic Effects of the EU ETS.*
Supervised by Isabelle Méjean and Stefan Pollinger.
Funded by LIEPP (Laboratoire interdisciplinaire d'évaluation des politiques publiques).

Paris School of Economics September 2024 – September 2025
Master Analysis and Policy in Economics, 2nd year entry Paris

Courses: Energy Economics, Econometrics, International Trade, Network Economics, Economic History, Economics of Happiness.

Academic projects: Documenting rejection probabilities of the standard t-test in DiD settings, using various methods for testing the parallel trends assumption; Research proposal to study life satisfaction disparities across language groups in bilingual Swiss cantons.

Master thesis: *Impact of ETS Indirect Carbon Cost Compensation: Evidence from French Industry.*
Supervised by Hélène Ollivier and Paul Dutronc-Postel.

École Nationale des Ponts et Chaussées September 2021 – December 2025
Master in Economics & Finance – Shortlisted for the Pasquet Excellence Award Paris

Courses: Statistics and Data Analysis, Stochastic Process, Game Theory, Macro- and Microeconomics, Market and Corporate Finance.

Academic projects: Cost-benefit analysis of the carbon capture technology; Impact of carbon taxes on trade; Comparison of energy transition scenarios for France (RTE) in terms of jobs; French foreign trade performance analysis; European automotive market outlook.

Exchange in Berlin - Humboldt & Technische Universität March 2023 – August 2023
Master in Industrial Economics Berlin

Courses: Energy Economics, Advanced Econometrics, Advanced Monetary Economics, Economic theory of financial crises.

Academic project: Institutional and political determinants of oil consumption in democracies. Panel Econometrics in R.

Lycées Louis-Le-Grand & Henri-IV – Classes préparatoires September 2019 – July 2021
Intensive preparation for the competitive entrance exams to French Engineering Schools. Paris
Maths & Physics.

Emile BELIN-BOURGOGNE Curriculum Vitae

Work experience

COMPASS LEXECON July 2025 – December 2025

Consulting firm specialized in energy modeling & regulatory analysis for electricity stakeholders – Intern Paris

- Valuation of losses on the electricity market for a delayed power plant project. Simulated counterfactual market equilibrium.
- Study of EU compensation schemes to incentivize solar PV operators to provide reactive power at night for grid balancing.
- Main project: Sector-level assessment of ETS compliance costs, with evidence from the French and Swedish steel sectors.

KAYRROS February 2024 – July 2024

French start-up quantifying energy stocks & environmental impacts using AI and satellite data – Intern Paris

- Improvement of Kayrros services tracking e.g. global carbon emissions, oil stocks, industrial and gas production in real time.
- Development of several quantitative policy and impact analyses for customers and public platforms.
- In-depth studies of: EU-ETS carbon supply evolution and regulation (CBAM); China's strategic oil reserve capacities; etc.
- Elaboration of an EU carbon price forecast model, based on weather data, gas prices, Kayrros data.

INTERNATIONAL ENERGY AGENCY September 2023 – February 2024

Part of the team drafting the World Energy Outlook, providing analysis for the energy sector – Intern Paris

- Transfer of existing models from Excel to Python and refinement of model architectures (e.g. energy financing flows model).
- Creation of a tool to automate input file preparation for the international energy trade model.
- Implementation of a data-visualization interface for the Python-based model estimating methane abatement costs.
- Data analysis on energy project financing in emerging countries; proofreading of reports; high-level conference organization.

Relevant skills

Languages: French (native speaker), English (fluent), Spanish (B2), German (A2).

Technical skills: Econometrics, Economics, Data Analysis, Energy Modeling, Optimization, Statistical Physics.

IT: Microsoft Office Tools, Python, C++, R, SQL.

Interests & activities

Hobbies - Musician (12 years of clarinet at Bordeaux Conservatory), English debating club (6 months).

Association - Co-founder of an independent association organizing screenings of student short films.

Volunteering - Humanitarian project aiming to optimize production of electricity while driving a cart.
